## FINAL HURRAH

## GMA foes discuss impeach rap in secret meet

By Ph Red Lito Lito

THE CONSTITUTIONAL TRIBUNAL (CT) may be called "the last line of defense" for the president, but it may also be the last line of defense for the president's enemies.

Opposition leaders, who have been trying to impeach President Benigno Aquino III, may have found a way to do so through the CT, which is the last line of defense for the president's enemies.

They may have found a way to do so through the CT, which is the last line of defense for the president's enemies.

They may have found a way to do so through the CT, which is the last line of defense for the president's enemies.

But the opposition is not the only group that may be called "the last line of defense" for the president's enemies.

They may have found a way to do so through the CT, which is the last line of defense for the president's enemies.

# Villagers flee as MILF gunmen lay claim to land

MANILA, Philippines — A wave of violence in the southern Philippines has forced thousands of villagers to flee their homes, as the MILF (Moro Islamic Liberation Front) gunmen lay claim to land in the region. The conflict, which has been ongoing for years, has reached new heights of intensity in recent months. Villagers in the area of Marawi, Lanao del Sur, have been particularly affected, with many fleeing to neighboring towns and cities. The MILF has announced that it has taken control of the area, and has ordered the evacuation of all non-Muslims. The Philippine government has expressed concern over the situation and has vowed to protect the rights of all citizens. The conflict has caused significant displacement and loss of life, and the international community has called for a peaceful resolution to the crisis.

## 100 families evicted from Davao hospital property

Davao City, Philippines — A large-scale eviction of families from a property owned by a hospital in Davao City has sparked controversy. The hospital, which is a major medical facility in the region, has announced that it is planning to expand its operations and has identified the property as a key area for development. However, the property is currently occupied by approximately 100 families who have lived there for many years. The hospital officials claim that the families are occupying the land illegally and that the eviction is necessary for the hospital's expansion plans. The families, however, argue that they have a long history of living on the property and that the eviction would leave them homeless. The local government has been asked to mediate the dispute, but no resolution has been reached yet. The situation has caused significant hardship for the families and has raised concerns about the hospital's management practices.

The conflict in the southern Philippines has continued to simmer, with reports of further violence and displacement. The MILF has been accused of human rights violations, including the killing of civilians and the destruction of property. The Philippine government has responded by launching military operations against the MILF, but these efforts have not resulted in a significant reduction in violence. The international community has expressed concern over the situation and has called for a ceasefire and a return to negotiations. The conflict has caused significant damage to the region's economy and infrastructure, and the lives of many people have been affected. The search for a peaceful resolution remains a top priority for all involved parties.

## Health group's back Charter change bid

MANILA, Philippines — A health group has renewed its bid for a Charter change, aiming to address issues related to the healthcare system. The group, which consists of medical professionals and public health advocates, has argued that the current Charter does not adequately address the needs of the population, particularly in the area of healthcare. They believe that a Charter change is necessary to ensure that the healthcare system is more efficient, transparent, and accountable. The group has submitted a proposal to the relevant authorities, but it has not yet been approved. The government has expressed interest in the proposal but has indicated that further studies and consultations are needed before a decision can be made. The health group remains committed to its goal and is planning to continue its efforts to bring about a Charter change.

PHILIPPINE DISASTER PREPAREDNESS WORKSHOPS TO BE HELD IN S. LEYTE

## Disaster preparedness tops agenda of workshops, training in S. Leyte

By Dennis B. Linares  
Cebu, Philippines — A series of workshops and training sessions on disaster preparedness are being held in the southern part of Leyte province. The workshops, organized by the Philippine Disaster Preparedness Center (PDPC), aim to enhance the capacity of local government units (LGUs) and communities to respond to natural disasters. The sessions cover a wide range of topics, including disaster risk assessment, emergency response planning, and community-based disaster preparedness. Participants include local officials, community leaders, and members of the public. The workshops are being held in various locations across the province, including Cebu, Marikina, and Marikina. The PDPC has expressed its commitment to supporting the LGUs and communities in their efforts to reduce disaster risk and improve disaster response. The workshops are expected to have a significant impact on the disaster preparedness of the region.

\_\_\_\_\_

There are a number of other issues that are not covered in this paper, but which are also relevant to the discussion of the role of the state in the economy. These include the role of the state in the provision of social services, the role of the state in the provision of health care, and the role of the state in the provision of education.

The diagram illustrates the experimental setup. A subject is seated at a table, looking at a video screen. A camera is positioned above the screen to capture the view. A light source is located to the left of the screen. A scale is placed on the table in front of the screen. The setup is used to study the perception of distance and size.

Figure 1 consists of two side-by-side scatter plots. The left plot is titled 'Poisson' and the right plot is titled 'lognormal'. Both plots show the relationship between the number of species (S) on the y-axis and the number of individuals (N) on the x-axis. The y-axis ranges from 0 to 100, and the x-axis ranges from 0 to 1000. The data points are represented by small circles. In both plots, there is a clear positive correlation between S and N, with the data points generally following a diagonal line from the bottom-left to the top-right. The Poisson plot shows a slightly steeper slope than the lognormal plot.

## Soul food at Dusit Hotel this May

By [Name] | [Date]

The Dusit Hotel is set to launch a new dining experience this May, featuring soul food from the Southern United States. The menu will include a variety of dishes, from comfort food to gourmet creations, all inspired by the rich culinary heritage of the South. The hotel's new restaurant, located in the heart of the city, will offer a warm and inviting atmosphere, perfect for enjoying these delicious dishes. The launch event will be held on May 15th, and the hotel is looking forward to welcoming guests to this exciting new venture.

Designing against roof leaks

1. The roof is the most vulnerable part of a building. It is the first line of defense against the elements. A well-designed roof can prevent leaks and damage to the interior.

2. The roof should be designed to shed water away from the building. This can be achieved by using a variety of techniques, including:

- Using a steep pitch
- Using waterproofing materials
- Installing a drainage system

3. The roof should be designed to withstand the elements. This can be achieved by using a variety of techniques, including:

- Using durable materials
- Installing a protective layer
- Regular maintenance

4. The roof should be designed to be easy to maintain. This can be achieved by using a variety of techniques, including:

- Using accessible materials
- Installing a walkway
- Regular maintenance

5. The roof should be designed to be aesthetically pleasing. This can be achieved by using a variety of techniques, including:

- Using attractive materials
- Installing a decorative element
- Regular maintenance

6. The roof should be designed to be cost-effective. This can be achieved by using a variety of techniques, including:

- Using durable materials
- Installing a protective layer
- Regular maintenance

7. The roof should be designed to be energy-efficient. This can be achieved by using a variety of techniques, including:

- Using reflective materials
- Installing a solar panel system
- Regular maintenance

8. The roof should be designed to be sustainable. This can be achieved by using a variety of techniques, including:

- Using recycled materials
- Installing a green roof system
- Regular maintenance

9. The roof should be designed to be safe. This can be achieved by using a variety of techniques, including:

- Using fire-resistant materials
- Installing a lightning rod system
- Regular maintenance

10. The roof should be designed to be secure. This can be achieved by using a variety of techniques, including:

- Using strong materials
- Installing a security system
- Regular maintenance

## South Forbes to energize new real estate boom

The new South Forbes development is set to transform the area into a vibrant hub of activity. The project includes a mix of residential, commercial, and recreational spaces.

The development is located in a prime location, just minutes from the city center. It offers a variety of amenities, including a shopping center, a park, and a community center.

The project is expected to create thousands of jobs and attract new businesses to the area. It is a major investment in the future of South Forbes.

## Portofino The new Alabang

The new Portofino development is set to transform the area into a vibrant hub of activity. The project includes a mix of residential, commercial, and recreational spaces.

The development is located in a prime location, just minutes from the city center. It offers a variety of amenities, including a shopping center, a park, and a community center.

The project is expected to create thousands of jobs and attract new businesses to the area. It is a major investment in the future of Portofino.

# Temple of Boom!

Aspiring rappers can take their beat-driven dreams into sonic reality at Miami's only DJ school. Epic City

**A** TYPICAL DAY AT THE TEMPLE OF BOOM! In the heart of Miami's hip-hop scene, a group of aspiring rappers are gathered around a turntable, practicing their craft. The DJ, a young man with a goatee, is spinning a track, and the rappers are taking turns freestyling over the beat. The atmosphere is electric, with everyone focused on their performance.

Young child I have little more

the 1990s, the number of people in the world who are illiterate has increased from 1.2 billion to 1.5 billion. The number of illiterate people in the world is expected to reach 1.7 billion by the year 2015. The number of illiterate people in the world is expected to reach 1.7 billion by the year 2015.

These findings have important implications for the design of a system to support the work of a team. First, the system should be able to support the team in the early stages of the task, when the team is still forming and the members are not yet familiar with each other. Second, the system should be able to support the team in the later stages of the task, when the team is performing well and the members are highly coordinated. Third, the system should be able to support the team in the middle stages of the task, when the team is still forming and the members are not yet familiar with each other. Fourth, the system should be able to support the team in the later stages of the task, when the team is performing well and the members are highly coordinated. Fifth, the system should be able to support the team in the middle stages of the task, when the team is still forming and the members are not yet familiar with each other. Sixth, the system should be able to support the team in the later stages of the task, when the team is performing well and the members are highly coordinated. Seventh, the system should be able to support the team in the middle stages of the task, when the team is still forming and the members are not yet familiar with each other. Eighth, the system should be able to support the team in the later stages of the task, when the team is performing well and the members are highly coordinated. Ninth, the system should be able to support the team in the middle stages of the task, when the team is still forming and the members are not yet familiar with each other. Tenth, the system should be able to support the team in the later stages of the task, when the team is performing well and the members are highly coordinated.

14. The following table shows the number of people who attended the 2004 Summer Olympic Games in Athens, Greece, by country. The data are given in thousands of people.

Country	Number of people (in thousands)
United States	10.5
China	9.8
France	8.2
Italy	7.5
Spain	6.8
Germany	6.1
Great Britain	5.4
South Korea	4.7
Japan	4.0
Australia	3.3
Canada	2.6
Other countries	1.9
